F (Cancel or Erase Pgm) followed by digit[3]	Erases the entire program	Cancels a profile and returns to IDLE

NOTES:

1. Proportioning GB1s have two monitor modes, one that displays power level and one that displays time. Pressing MODE advances along the cycle PROGRAM MODE → MONITOR TIME MODE → MONITOR POWER LEVEL MODE → PROGRAM MODE → ⋯ .

2. This temperature can be altered. See the HOLD key description in the "Keypad" section of the manual for details.

3. This digit is required by the "Confirmation Sequence".
